Work Experience

Full Stack Engineer

May 2025 - Present

FYC Labs

San Francisco, CA

- Build and ship full-stack web and mobile applications in a fast-paced, client-facing agency environment, delivering production code used by thousands of users.
- Develop React web applications and React Native mobile apps using TypeScript, Node.js, Prisma, and PostgreSQL.
- Own features end-to-end, from requirements gathering and system design through implementation, release, and post-launch support.

Full Stack Developer

May 2024 - May 2025

Symphony Partners

San Jose, CA

- Developed an AI-powered chatbot on MERN stack and OpenAI, automating legal document generation and API connections to cut manual processing time.
- Built the Symphony Partners website using Next.js and TypeScript, enhancing developer efficiency, streamlining UI components, and enforcing best practices with modern React.

Web Development Instructional Specialist

December 2022 - May 2024

2U / edX

San Diego, CA

- Mentored students in full stack web development, working one-on-one to offer personalized guidance on JavaScript, React, Node.js, SQL, MongoDB, and Git
- Led debugging sessions, code reviews, and technical discussions in order to support student learning and collaborative problem-solving while promoting best practices through version control and Agile methodology.

Technical Skills

Frontend: TypeScript, JavaScript ES6+, React, Next.js, Zustand, Redux, HTML, CSS

Backend: Node.js, Express.js, SQL, MongoDB, Prisma, REST, GraphQL, WebSocket, OpenAI

Platforms & Processes: AWS, GCP, Firebase, Github, Shopify, Vercel, CI/CD, DevOps

Education

University of California San Diego

June 2022

Certificate in Full Stack Web Development

San Diego State University

December 2021

Bachelor of Science, Biology, cum laude, Weber Honors College | GPA: 3.5, Major GPA: 3.7
